

DESCRIPTION

This bicycle mobile holder (compatible with scooter, motorcycle, moped, stroller) allows you to use your smartphone during your outdoor trips. The first bike mount made in France, in Annecy (Haute-Savoie) ! Light and easy to install on your handlebars, it absorbs the vibrations of the most damaged roads and allows you to have your phone within reach and totally secure.

The image of your screen is thus stabilized during your simple rides as well as during your sports sessions. You will be able to follow your road or your performances without any difficulty. This cycle mount is adapted to the standard handlebars and is provided with 2 non-slip joints for a diameter of 22,2 or 31,8 mm.

It is compatible with all brands of smartphones thanks to the universal adapter that sticks to the back of your phone or your Mobilis case. Also, thanks to its rotating system, it offers 2 positions of use: portrait or landscape mode.
