

# BUTTERFLY VALVE VALVE SERIES 300

## Mounting Flange:

ISO 5211 mounting flange accommodates direct mounting of all types of actuators, including; handles, gear operators, electric and pneumatic

## O-Ring:

Tertiary stem seal provide further assurance against stem leakage.

## Hub-seal:

Smooth finished disc flats mate with seat flats to give a highly efficient primary seal that prevents leakage into the shaft area and minimizes torque.

## Disc:

Precision profile provides bubble-tight shut-off, assures minimum torque and longer seat life. Maximum flow is achieved by eliminating the "through shaft" and external disc fasteners.

## Weather Seal:

O-ring seals keep dust and moisture from entering the upper stem.

## Stem:

Stub shaft design allows the disc to float within the flow-way increasing cycle life.

## Bushings:

Stem bushings reduce torque and isolate the stem from the valve body, preventing seizure of the stem due to corrosion in the stem journal. (4 Bushings)

## Seat Face:

Seat to flange seal eliminates the need for flange gaskets.

## Seat:

Phenolic-backed seat non-collapsible, stretch-resistant, blow-out proof and replaceable in the field.

Series 300 Butterfly Valves

Available in Sizes 2" to 12"  
 Available in Wafer or Lug style body  
 Wafer body features four alignment holes  
 Pressure Ratings for tight shut off at temperatures up to the maximum limit of the seat material:  
 2" to 12" 200 psi, 125psi for Teflon seat.  
 Ideal for on - off or throttling services

Available with handles, manual gear operators and electric or pneumatic actuators  
 Operator can be mounted perpendicular to the pipeline  
 Designed to comply with MSS SP - 67 and API609. For exact valve measurements, see dimension table.  
 Compatible with ANSI 125/150, PN10/16, BS 10 Table E

Dimensions 2" to 24"

DN	Size	A	B	C	D	E	F	G	J	KG (Lugged)	KG (Wafer)
40	1 1/2"	130	64	36	13	10X10	7	F05	70	3.00	2.50
50	2"	162	80	44.45	13	10X10	7	F05	70	3.18	2.72
65	2.5"	174.5	89	47.63	13	10X10	7 (9)	F05/F07	70	3.63	3.18

300	12"	336.5	242	79.38	18	22X22	9 (10)	F07/F10	95	47.63	31.75

Dimension C, face to face, is listed with elastomer in the relaxed condition. Approximately 3mm total compression is required for proper sealing with pipe flanges.

Seat Temperature Ratings

Material	Temperature Range °F		Temperature Range °C	
	From	To	From	To
Buna-N	10	180	-12	82
Abrasive Resistant Buna-N	10	180	-12	82

All torques shown on the chart are based on test data using water @ 60°F. For torques using dry gases, multiply these numbers by 1.6. For torques involving other media, please consult sales.

There is no safety factor included in the numbers shown on this chart. For actuating sizing, we recommend that you multiply these values by 1.2 for single valve applications, and 1.5 for 3-way ("tee") applications. Actuators shown are based on wet service and air supply of 6 bar to the actuator.

### C.v. Values-Valve Sizing Coefficients (UK GPM @ 1 Δ P)
