## Light Range

With a narrower band than the Original Jubilee ${ }^{\circledR}$ Clip, this lightweight clip is designed to offer an excellent seal at slightly lower torques. The Jubilee ${ }^{\circledR}$ Light Range is manufactured to DIN 3017 and, like the Original Jubilee ${ }^{\circledR}$ Clip, all clips are continuously threaded to enable extra flexibility when adjusting the clips to the required size. This clip is most suited to applications where space, or weight, is restricted and often used in car and light commercial vehicle applications.

The Jubilee ${ }^{\circledR}$ Light Range clip meets the high standard of quality and performance required of all Jubilee ${ }^{\circledR}$ products. The benefits of weight saving and extra corrosion resistance allow this addition to the full range of Jubilee clips to offer the customer a greater flexibility in meeting their own requirements.

Our Jubilee ${ }^{\circledR}$ Light Range in zinc protected mild steel was originally designed specifically for use in the automotive industry and the automotive aftermarket to comply with DIN 3017, but are also suited for other applications where space, or weight, is restricted in e.g. agricultural applications, the industrial sector and hardware/DIY applications.

Jubilee ${ }^{\circledR}$ Light Range hose clips in 304 (18/8) stainless steel are used in the marine, oil and gas and food sectors, as well as the agricultural, hardware and industrial sectors, where higher corrosion resistance is required, but space and/or weight are at a premium.
