

Mounting Accessories

All pipes are subject to thermal expansion or contraction. It is therefore essential that the designer or installer selects the correct support system to accommodate such movement.

The comprehensive range of Flamco pipe support systems and components provide a solution for all conditions and pipe materials including fixed-point installations.

Everything else you need for optimal installation

Proper pipe support demands there is a wide range of quality fixtures and fittings available. Because you'll need more than just a clip and a pipe, Flamco offers an extensive range of mounting accessories.

SCS Self Tapping Concrete Screws

The innovative fastening system for concrete and brickwork with general type approval. The approved mounting system uses a new way of applying anchoring technology. The screw anchor can be fitted without plugs.

The advantage: significant time savings when mounting/unmounting.

The technical arguments will convince anyone

Low torquing levels, fastening without spread pressure and approval for use with cracked uncracked concrete are the most significant technical features of these concrete screws. SCS concrete screws create a fastening that retains its shape, without spread pressure, in half the time. Using SCS concrete screws it is possible to work close to the edge, recycle elements and work without a torque spanner, among other things.

- There is no curing time, the anchor can be loaded immediately.
- Fastening from inside the rail is possible at all times.
- There is no prescribed turning torque monitoring.
- Machine assembly presents no problems.
- Represents time savings of up to 50%.
- Can be completely disassembled.
- Has general type approval.

NOISE SUPPRESSION STRIPS

For insertion in clip and rail fittings.

- Rubber EPDM.
- At normal frequency and pressure range, noise suppression 20 dB(A).
- Suitable for temperatures -40 °C to +110 °C.
- Electrical values: specific resistance: 2 x 109 Ωcm.
- Surface resistance: 2 x 109 Ω.

N.B.: When noise suppression strip is used, the chosen clip must be able to accommodate the outside diameter of the pipe to be fitted.

SR Suitable for BM, BK or BSF clips. • Breaking elongation: 400%. • Tensile strength: 500 N/cm². • Impact resilience: 35%.

K Ball Hangers

For a flexible and vertically adjustable suspension.

- Electrolytically zinc plated.
- Maximum swing of the ball element: $2 \times 20^\circ$.
- Vertically adjustable by turning lowest part of the ball hanger after fitting the pipe.
- Inspection hole for checking length of rod inside the hanger.
- Safety load (V) = 3.

BACKPLATES

For a rigid wall or ceiling fastening of a clip by means of a threaded rod/pipe.

- Electrolytically zinc plated.
- Slotted holes for fixing.
- Can also be used in fixed point constructions, in combination with KB clips or BVP bracket, fixed point.

EXPANSION UNITS

The expansion units are specially designed to allow for thermal expansion along the length of the pipe. This makes for a superb and solid joint which if necessary can move with the pipe.

GK 50 Expansion Units

- Sliding block: nylon PA 6.
- Threaded connection: brass.
- Applicable in Flamco rails R 1, R 2, R 3, R 4 and R 6.
- Maximum axial movement depends on rail length.

GK 150 Expansion Units

- Backplate S235JRG2 EN 10250/2: electrolytically zinc plated.
- Carriage holder: nylon PA 6.
- Tube S235JRG2 EN 10250/2: electrolytically zinc plated.
- Plate stop: plastic.
- Standard axial movement 60 mm.
- Enlarged axial movement when Flamco rail R 2 is used instead of pipe.
- Slotted holes for accurate adjustment of the expansion unit.
- Applicable for different threaded connections.

PROFILE FIXINGS

For fixing a single suspension under a steel profile, obviating the need for drilling or welding. They are available in different threaded connections and some versions may be adjusted vertically after fixing.

KC Profile Clamps

For securing a single mounting next to or under a steel profile without welding or drilling.

- Forged steel C 22/C 35 - DIN 17200.
- Bolt: steel DIN 564-8.8.
- Uncoated or zinc plated.

AIR DUCT BRACKETS

For mounting air ducts.

- Electrolytically zinc plated.
- Rubber shock absorber at the attachment point of the threaded rod for noise-suppression.

LR Air Duct Bracket

For mounting round air ducts.

- Noise reduction: 18 dB(A) according to ISO 3822-1.

LZ Air Duct Bracket

For mounting rectangular air ducts.

- Noise reduction: 19 dB(A) according to ISO 3822-1.

Technical drawing of the LZ 40 air duct bracket showing three views: isometric, front, and side. The front view shows dimensions B (width), E (height), and G (hole offset). The side view shows dimensions A (width), C (hole offset), and D (height).
