

'PC' Compression Nut for PVC Covered Copper Tube, Imperial

Wade

Features & Benefits

- A range of brass compression nuts with BSP parallel and metric parallel female threads
- Designed for use with imperial and metric outside diameter PVC covered copper and nylon tubes
- This original Wade design prevents atmospheric corrosion and contamination within the joint and also protects the ends of the outer PVC cover from damage
- Specifically designed for use in combination with Wade bodies and compression rings, we cannot recommend interchangeability with other brands
