

Non-melting, high temperature bearing grease

MOLYSLIP

Description

MOLYSLIP ARVINA EH2 is a premium quality grease designed for the lubrication of ball, roller and plain bearings operating in high temperature environments. ARVINA EH2 contains a semi-synthetic base oil thickened with an organo-modified bentonite clay, fortified with anti-oxidant, extreme pressure, anti-wear and corrosion inhibiting additives. The load carrying ability is further enhanced by the inclusion of micronized molybdenum disulphide (MoS₂) which forms an ultra-low friction solid lubricant film.

MOLYSLIP ARVINA EH2 has excellent high temperature tolerance and good anti-wear characteristics which reduce friction and protect bearings from damage caused by and wear and shock loading. ARVINA EH2 is suitable for use in numerous different industries at temperatures up to 230°C.

Features and benefits

- Excellent temperature resistance
- Good load carrying and anti-wear properties
- Non-melting bentonite clay thickener
- Effective protection against corrosion

Instructions for use

MOLYSLIP ARVINA EH2 can be applied manually, via a standard grease gun or via a central lubricating system capable of pumping an NLGI 2 grease.

As with all greases used for the first time, check compatibility with the grease used previously and if necessary purge bearings prior to application.

Packaging

400g cartridge, 450g tin, and 4.5kg pail
