

Push-in fittings and connectors QS

FESTO

Festo core product range
Covers 80% of your automation tasks

Worldwide:

Always in stock

Superb:

Festo quality at an attractive price

Easy:

Reduces procurement and storing complexity

Generally ready for shipping ex works in 24 hours
Held in stock in 13 service centres worldwide
More than 2200 product

Generally ready for shipping ex works in 5 days
Assembled for you in 4 service centres worldwide
Up to 6 x 10¹² variants per product series

Look for the star!

Push-in fittings QS

Features

FESTO

Application

Effortless selection of the right fitting. Festo offers a secure solution for every connection. The convenient push-in fitting system includes well over 1000 types of standard and function fittings.

Summary of tubing/fitting combinations			
Applications	Fitting	Tubing	Description
Standard	QS	PEN	Suitable for a wide range of tasks and attractively priced. Flexible thanks to high levels of resistance, easy to install thanks to optimised bending radii. High level of abrasion resistance in dynamic applications.
	QS	PUN	Maximum flexibility in standard applications thanks to an extremely wide range of options for combining the different types.
	QS	PAN	Meets all requirements, even for standard applications with increased pressure and temperature ranges.
High pressures	NPQM	PAN-MF	Meets DIN standard 73378: ideal for use in mobile pneumatics. Suitable for increased temperature ranges combined with high pressure ranges.
	NPQH	PAN-R	Powerful in pressure ranges up to 20 bar, for example in applications with the pressure booster DPA.
Resistant to chemicals, food safe and hydrolysis resistant	NPQP	PLN	Resistant to cleaning agents, FDA compliant and economical. Can be used instead of the combination with stainless steel fittings.
	NPKA	PUN-H	Hydrolysis resistant and suitable for water applications. Combination suitable for use in clean rooms, FDA compliant and corrosion resistant as it is made of 100% polymer. Very easy to install thanks to the "one click principle".
	NPQH	PFAN/PTFEN	For high temperatures up to 150 °C. Food safe, FDA compliant and resistant to cleaning agents.
	NPCK	PFAN/PTFEN	Easy to clean thanks to the union nut's edge-free design. Maximum resistance to corrosion (CRC 4) and FDA compliant. Suitable for a wide range of media.
	CRQS	PFAN/PTFEN	Maximum resistance to corrosion (CRC 4) and to aggressive acids and alkalis.
Resistant to chemicals and hydrolysis resistant	NPQR	PFAN/PTFEN	Optimised design, reduction in edges where dirt can collect – all at an attractive price. For high temperatures up to 150 °C. Pressure range up to 16 bar. Highest level of corrosion resistance (CRC 4).
Antistatic	NPQM	PUN-CM	Antistatic tubing plus solid metal fitting: maximum protection for electric and electronic components.
Flame retardant	NPQM	PUN-V0	Very safe in areas where there is a risk of fire thanks to flame-retardant properties. The tubing has been tested to DIN 5510-2.
Resistant to welding spatter	NPQH	PUN-V0-C	Ideal for applications involving welding spatter. Reliable thanks to a tubing wall thickness of 2 mm for all diameters.
	QS-V0	PAN-V0	Safe even in the close vicinity of welding spatter thanks to the double-walled tubing with special fitting.

Push-in fittings QS

Features

FESTO

Push-in fittings product range

QSM, mini series

Miniature push-in fittings for maximum component density in confined spaces. For pneumatic applications with a temperature range up to 80 °C and a pressure range up to 14 bar. Tubing outside diameters of 2, 3, 4 and 6 mm with connecting threads M3, M5, M6, M7, R $\frac{1}{8}$ and G $\frac{1}{8}$.

Technical data → Internet: qsm

QS, standard series

Wide selection of push-in fittings for pneumatic applications with a temperature range up to 80 °C and a pressure range up to 14 bar. Tubing outside diameters of 4, 6, 8, 10, 12, 16 and 22 mm with connecting threads R $\frac{1}{8}$... R $\frac{1}{2}$ and G $\frac{1}{8}$... G $\frac{3}{4}$.

Technical data → Internet: qs

CRQS, stainless steel

Stainless steel push-in fitting. High corrosion resistance CRC 4 and chemical resistance with approval for use in the food and packaging industry. For pneumatic applications with a temperature range up to 120 °C and a pressure range up to 10 bar. Tubing outside diameters of 4, 6, 8, 10, 12 and 16 mm with connecting threads M5 and R $\frac{1}{8}$... R $\frac{1}{2}$.

Technical data → Internet: crqs

QS-V0, resistant to welding spatter

Flame-retardant push-in fitting for use in all areas where there is a risk of fire, for example welding systems in the automotive industry and in the construction industry. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 10 bar. Tubing outside diameters of 4, 6, 8, 10 and 12 mm with connecting threads R $\frac{1}{8}$... R $\frac{1}{2}$ and G $\frac{1}{8}$... G $\frac{1}{2}$.

Technical data → Internet: qs-v0

NPQH

Solid metal push-in fitting made of chemically nickel-plated brass. High corrosion resistance CRC 3 and chemical resistance. For pneumatic applications with a temperature range up to 150 °C and a pressure range up to 20 bar. Tubing outside diameters of 4, 6, 8, 10, 12 and 14 mm with connecting threads M5, M7 and G $\frac{1}{8}$... G $\frac{1}{2}$.

Technical data → Internet: npqh

NPQM

Attractively priced metal push-in fitting for pneumatic applications with a temperature range up to 70 °C and a pressure range up to 16 bar. Tubing outside diameters of 3, 4, 6, 8, 10, 12 and 14 mm with connecting threads M5, M7 and G $\frac{1}{8}$... G $\frac{1}{2}$.

Technical data → Internet: npqm

NPQP

Polypropylene fitting for use in applications with extreme influence of media. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 10 bar. Tubing outside diameters of 4, 6, 8, 10 and 12 mm with connecting threads R $\frac{1}{8}$... R $\frac{1}{2}$.

Technical data → Internet: npqp

NPQR, stainless steel

Stainless steel push-in fitting. Maximum corrosion resistance CRC 4 and chemical resistance. For pneumatic applications with a temperature range up to 150 °C and a pressure range up to 16 bar. Tubing outside diameters of 4, 6, 8, 10 and 12 mm with connecting threads M5, M7 and G $\frac{1}{8}$... G $\frac{1}{2}$.

Technical data → Internet: npqr

Push-in fittings QS

Features

FESTO

Functional push-in fittings product range

QSK, self-sealing push-in fitting

Technical data → Internet: qsk

Push-in fitting that blocks the air flow after the tubing is disconnected. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 14 bar. Tubing O.D. ∅ of 4, 6, 8, 10 and 12 mm with connecting threads M5, R1/8 ... R1/2 and G1/8 ... G1/2.

QSR, rotary push-in fitting

Technical data → Internet: qsr

Push-in fitting with swivel connection, rotatable by 360°. The ball bearing enables rotating movements in the application up to max. 500 rpm. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 14 bar. Tubing O.D. ∅ of 4, 6, 8, 10 and 12 mm with connecting threads M5, R1/8 ... R1/2 and G1/8 ... G1/2.

Quick connectors product range

NPCK

Technical data → Internet: npck

Stainless steel fitting for use in areas subject to intensive cleaning. Highest level of corrosion resistance (CRC 4). For pneumatic applications with a temperature range up to 120 °C and a pressure range up to 12 bar. Tubing O.D. ∅ of 4, 6, 8 and 10 mm with connecting thread M5 and G1/8 ... G3/8.

Click fittings product range

NPKA

Technical data → Internet: npka

Plastic fitting for easy installation with one-hand operation. Hydrolysis resistant, FDA compliant and easy to clean. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 10 bar. Tubing O.D. 6 mm with connecting thread G1/8.

Push-in fittings QS

Key features

FESTO

Simply "plug and work"	Reliably connected	Captive seal	Orientable
			
The stainless steel retaining claw within the fitting holds the tubing securely without damaging its surface. Vibration and pressure surges are safely absorbed.	A nitrile rubber sealing ring guarantees a perfect seal between standard OD tubing and the body of the fitting. Standard tubing is suitable for use with compressed air and vacuum.	All brass parts of Festo's push-in fittings are nickel plated and are thus highly resistant to corrosion. The tapered ISO R threads have a self-sealing PTFE coating, which allows the fitting to be re-used up to five times without the need for additional sealing components.	The fitting can be aligned after assembly.

Tube assembly/disassembly			
Mounting		Dismantling	
The prerequisite for ensuring that the inside seal is securely held and protected against damage is that the tube be cut to straight lengths and deburred.			
1) Insert tubing until the end stop. It is important to ensure that the tubing is inserted into the inside	seal. Depending on the tolerance position of the tubing and the seal, the contact of the tubing with the seal may be wrongly interpreted as the end stop.	1) The tubing can be detached easily by pressing down and holding the releasing ring. Remove the tubing carefully from the threaded connector.	2) Before re-using the tubing, remove the damaged part by cutting it off.
2) Check that the tubing connector is securely held by pulling gently on the tube.			

Push-in fittings QS

Key features

FESTO

Which fitting fit which thread?

Metric parallel thread

- Cylindrical metric thread is comparable with G thread
- Sealing is guaranteed via a sealing ring
- Sealing on front face

G parallel thread to ISO 228-1

- Shorter thread
- Constant installation depth
- Replaceable sealing ring
- Sealing on front face
- Can be re-used a number of times thanks to replaceable sealing ring

R tapered thread to EN 10226-1 and ISO 7/1

- Self-sealing thread
- Sealing via coated threads
- No additional sealing surface required
- Smaller installation dimensions since there is no need for a rebate for the sealing surface
- Can be re-used up to five times

Recommended tightening torque

When using push-in fittings with internal hex, ensure that the Allen key is not inserted too far into the fitting to

prevent the risk of damage to components behind the fitting.

-  - Note

All R-threads are coated with a sealing material. This coating replaces the conventional sealing ring. Simply screw in the R-thread by hand and tighten it with 1 or 2 turns of a spanner. The fitting can be reinstalled up to five times. When screwing in R-threads several times, you must make sure that the abraded particles from the sealing material coating cannot enter the compressed air system.

Connecting thread	Nominal tightening torque [Nm]
M thread

2) The supplied sealing ring must be replaced with an OL sealing ring on push-in fittings with a G-thread → Internet: ol

3) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. For dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation may occur. External visible parts with primarily decorative requirements for the surface and which are in direct contact with the ambient atmosphere typical for industrial applications.

Operating pressure p as a function of temperature t
