Electric Bagger

Model

A unique design allows the Mulch Bagger to handle bark, nuggets, hardwood mulch, cypress mulch, chips, and many other wood by-products.

A rotary drum that works like a water wheel combs the rough mulch into an even flow for bagging. The electric drive system will allow you to fill as many as 18 bags a minute.

If the hopper becomes empty, a sensor under the conveyor will start another conveyor to bring mulch into the Mulch Bagger hopper.

You can add to your Mulch Bagger or Soil Bagger an even larger system for palletizing bags for storage or shipment.

Specifications

Power	5HP/ 220V/ single or three phase/ 50 or 60 Hz
Production	Up to 18 bags per minute
Dimensions	102"L x 75"W x 116"H
Weight	Approximately 1,400 lbs
Options	<ul style="list-style-type: none"> Bag carrying conveyor Hot air sealer Bag kicker Bag flattening conveyor Elevating platform Palletizing carousel
