Angled voice and data plate with dust cover for 2 RJ45 connectors graphite Simon 82

REF. **82579-31**

BASIC INFORMATION

DESCRIPTION

Angled voice and data plate with dust cover for two RJ45 connectors with ivory finish of the Simon 82 series, you can have three different finishes available for this component, as we always recommend that the colour of the frame is the same baseboard colour as the selected for the selected plate. For its installation, it must be taken into account the following measurements of the plate 55x55 mm, which will be used to position, place your element where you want it, since it is suitable for surface mounting or flush mounting where you want it, in addition, you know that the Simon 82 series has full compatibility with the mechanisms of the Simon 77 series, which allows you to set up an installation in just two steps and without touching the wire to strip or braid it. Take advantage of balance and simplicity to create trend with the Simon 82 collection. Make yourself with the minimalist design combined with noble finishes and a wide selection of textures that will not leave you indifferent when it comes to establishing the decoration of your home.
