

Rocker half element for switches white Simon 82 Centralisations

REF. 82010-60

BASIC INFORMATION

DESCRIPTION

Rocker in individual version and half element, especially for control mechanisms, it belongs to the series of rockers and covers Simon 82 Centralisations and has a discreet finished in white colour neutral. These shades are the best option for those who prefer wager on simplicity. This Simon product is available in a total of five different finishes, so it is advisable to choose the frame in the same colour necessary that the white rocker that it has decided to install, although the sets of colour are an option of the user. The rocker Simon does not include a connections marked, you must install or on the surface-mounted or flush mounted and also does not have any engraving, so it is useful for any control mechanism, maintenance is very simple, as it will only need to clean it with a cloth slightly dampened with soap and water, without or aggressive cleaning products containing chemical.
