

IP66 watertight concrete floor box empty kit for 1 Simon K45 mechanism + 1 narrow blind cover and sheath

REF. KGH100CF/74

BASIC INFORMATION

DESCRIPTION

Simon completely renews its range of waterproof floor boxes for indoor and outdoor environments. This is a kit that includes the manual locking mechanism frame with capacity for 1 K45 function of 45x45mm and another of 22.5x45mm, to be integrated into the included basin for installation in flooring. We are looking at a trimless IP66 box of 115 x 115 mm, which will be perfectly integrated into our floor. The product design, combined with its mechanism support frame made of stainless steel, ensures a robust, solid, and secure installation as it withstands a water jet of 1 kg/cm² in any direction, achieving an IP66 protection degree when the lid is closed. It also supports a maximum load of 1500 kg and has an IK08 impact resistance. It maintains an optimal cable bending radius for high category voice and data connections. Our accessory for plug connection with the lid closed is available, allowing us to keep our connections active with an IP54 (see reference KFA1001), the possibility to level our box in case of irregular flooring (see reference KFA1003), or the capacity to connect more than one box (see reference KFA1002).
