

Plate for electronic rotary mechanisms brown Simon 88

REF. 88054-32

BASIC INFORMATION

DESCRIPTION

Plate of the series Simon 88 brown in colour (even if it is available in 3 finishes), that is used for the electronic rotating mechanisms. Its diameter is 68,3 mm and is made of thermoset, a material that is very easy to clean, as you will only have to wipe it with a soft cloth slightly moistened in soapy water, without resorting, at any time, to cloths or abrasive cleaners containing chlorine in its formulation, as it could be damaged but and does not reach operate correctly. It can be installed in rooms with a temperature of between 5 and 40°C, approximately, although it is able to withstand extreme temperatures of -25 to 50°C, plus or minus. The series Simon 88 breaks the square shapes, which gives this series strong personality. Moreover, its circular or square frame and the shape of its rocker attract glances, at the same time, which challenge the preconceived ideas.
