

Cover for 1 gloss white USB connector Simon 100

REF. 10001091-130

BASIC INFORMATION

DESCRIPTION

In a simple but elegant white color with quartz effect, the cover for 1 USB connector of the Simon 100 series is specially designed for easy installation, because it is enough to indent it on the plate that we want to cover. It is also manufactured in PMMA with thermoplastic sleeve, in accordance with the current regulations EN 50581: 2012. Thanks to the resistance of its material, the cover can operate with full guarantee at temperatures ranging from 0 to 40 °C, while retaining a maximum of -25 to 75 °C. At Simon, we care about offering the best quality products for the peace of mind of our customers. Regarding the care and maintenance of the cover, simply use a cloth dampened in a soapy water solution, avoiding abrasives containing chlorine at all times, as they could damage the finish of the piece.
