

Rocker half element for switches aluminium Simon 82 Centralisations

REF. 82010-63

BASIC INFORMATION

DESCRIPTION

This rocker Simon has been specially designed for the control mechanisms of the brand. It is part of the Simon 82 series, Centralizations and commitment to a modern and avant-garde finished in aluminium. This finish, it is perfect for rooms in which the appearance plays a fundamental role. The rocker Simon in question is presented in individual version and is to half element. As the product is available in a total of five different finishes, from the brand recommend resorting to a frame in aluminium, to keep the appearance of the entire product. However, if you want you can opt for varied combinations. It is possible to install it both in surface-mounted and flush mounted, which provides the product maximum versatility. This rocker Simon does not include engraving or signaling function and you just need to clean it with a soft cloth, moistened in water with soap. With this simple maintenance, the functionality of the product is great over time.
