BASIC INFORMATION

DESCRIPTION

This product is part of the Simon 82 range, consists of a frame size 58 x 89 millimetres, ideal for mechanisms that supplied energy to two elements. The Simon products, it is characterized by its easy installation. In this case, the installation of the frame can be carried out by means of recessed or surface-mounted directly on. The frame Simon 82 comes in an original finish on the aluminium socket graphite colour, a combination of modern and avant-garde, which is perfect for rooms with the same decorative style. For this reason, it is advisable to combine it with rockers and covers in graphite colour, to give harmony appearance to the final product. The manufacturing materials stretch the service life of the product, as they are very resistant and quality. Specifically the baseboard is thermoplastic, which allows the product can withstand high or low temperatures without losing functionality. Meanwhile, the frame is made of zamak, a zinc alloy with aluminium, magnesium and metal that is its hardness and makes it very little sensitive to external harmful actions.
