Frame for 2 elements white Simon 82

REF. **82620-30**

BASIC INFORMATION

DESCRIPTION

It is a frame designed for 2 elements in white colour that is part of the Simon 82 series, a collection that stands out for its minimalist designs and avant-garde finishes. It measures 158x89 mm and has been manufactured in strict compliance with the current regulation. The baseboard is made of thermoplastic and the frame of thermoset. The robustness of its materials makes it an article resistant to the scratches and also to the most extreme temperatures. However, to achieve optimal conditions of preservation, it is recommended to install the frame in environments with a temperature range between 5 and 40ºC. It is also suitable for surface and flush mounting. When combining the frame with rockers and covers, do select them with white finish for a more satisfying effect. In terms of maintenance, you can clean the product dampening a cloth in soapy water. This will keep it in perfect condition for longer.

FINISH

White

COMPATIBILITY

Simon 75, Simon 77 and Simon 82 mechanisms

PACKAGING CONTENTS

Frame with 2 elements

MATERIAL

Plastic

ETIM CLASS

EC000007
