

Cover for key mechanisms/mono speaker ivory Simon 75

REF. 75057-31

BASIC INFORMATION

DESCRIPTION

This Cover is part of the Simon 75 series and is designed for mono loudspeaker key mechanisms, its installation is very simple and is carried out directly in surface-mounted or by recessing, depending on the tastes and needs. The cover is available in a stylish and original grey colour, but it is available in a total of 6 finishes, so it is recommended to choose one with the same baseboard colour as the selected rocker. In this way you will obtain a perfect harmony appearance without break with the decorative line of the end product. The cover is made of high quality thermoplastic. Thanks to the fact that it is very resistant and ensures optimum operation under high or low temperatures ranging from -25 to + 50 degrees centigrade. It also gives it an extra hardness against possible external harmful actions. Its maintenance and cleaning is very simple and can be carried out with a soft cloth slightly dampened in water and soap, being counterproductive chemical products of cleaning, especially if they are abrasive or carries chlorine.

FINISH

Ivory

MATERIAL

Thermostable
