

Double rocker for switches graphite Simon 88

REF. 88026-38

BASIC INFORMATION

DESCRIPTION

Having an electrical or electronic system that put two devices from a single point provides the operation of the same. The concern for the protection and security for these installations, it is one of the concerns present in Simon since its beginnings. In its 88 series we find the double Rocker for control mechanisms in graphite to meet this need. With dimensions of Ø 68.3 mm, this double rocker for control mechanisms is available in three different finishes, a circumstance that allows customers to choose the one that best suits you for the decoration of the spaces where go to be installed. Resistance and durability are two features that has its structure, which has been manufactured with the best thermoset materials, without that this has an incident directly in its price, which allows you to include this element in all types of budgets.
