Plate for telephone sockets with RJ11 and RJ12 connectors white Simon 82

REF. **82062-60**

BASIC INFORMATION

DESCRIPTION

A poor installation of the elements that make up fixed telephony systems can have negative consequences on our communications, either in homes or companies. To avoid all this kind of incidents, it is best to have the Plate for telephone sockets with connectors for the formats RJ11 and RJ12 in white colour of the Simon 82 series. It is a 55x55 plate that will keep our communications safe, being suitable for surface and flush mounting. Also, it is available in 6 finishes, so it is recommended to choose a frame with the same baseboard colour as the selected rocker. Made of thermoplastic, this plate has a recommended temperature range of 5º to 40º C and should be cleaned with a soft cloth slightly moistened in soapy water, never with abrasive cleaners that contain chlorine. It does not need more maintenance to make it look like the first day.
