Plate for electronic rotary mechanisms with built-in red light champagne Simon 82

REF. **82050-34**

BASIC INFORMATION

DESCRIPTION

With a built-in red indicator light, this individual plate for electronic rotating mechanisms, of the Simon 82 series, it is in champagne colour. It does not include any type of engraving. It is a plate style that makes spaces more comfortable because it is compatible with the most advanced functions, as well as the other components of the Simon 82 collection, which can be used with the 75 Series mechanisms. If we want it to stay as good as new over time, we have to clean this plate properly. To do this, it is recommended to avoid products that contain chlorine or are abrasive and to gently wipe with a soft, dry cloth. Its shape is square (55 x 55 mm) and made of galvanized thermoplastic material. To run the installation correctly, it is necessary to use a universal recessed box or, in its absence, a baseboard surface-mounted.

FINISH

Champagne

MATERIAL

Plastic

PACKAGING CONTENTS

Plate

SYMBOL

Without engravings

COMPATIBILITY

Simon 75 mechanisms
