

Telephone socket half element with 6 pins RJ12 graphite Simon 82 Centralisations

REF. 82481-68

BASIC INFORMATION

DESCRIPTION

The series Simon 82 Centralisations includes many products of the highest quality to perform all types of electrical links. This is the telephone socket in individual version and half element, which has a total of six RJ12 pins. The product has a nice graphite grey colour finish, which gives modernity and design. The installation of this telephone socket of Simon is versatile, since it is possible to place it on surface-mounted or flush mounted, taking into account the needs of this product. The includes a connector and has two strands. It is a Simon product category 3, that focuses on the screw terminal connection and its operation is by insertion. The brand recommended to clean the telephone socket with a soft cloth, slightly dampened in a solution of soapy water, avoiding the use of aggressive cleaners with the materials of manufacture of the product. Therefore, maintenance is that requires a minimum.
