

Trim frame for 2 elements ivory Simon 27

REF. 27960-32

BASIC INFORMATION

DESCRIPTION

This product is part of the Simon 27 series is a frame that is not only complies a protective function of a mechanism that provide energy to two elements, but also has a trim function. Simon has created a series of lines in their products, looking for always integration in the decoration of different rooms, always without losing sight of the functionality of the product and the reason why it was made. Simon thus combines appearance and functionality with this frame that comes in an ivory finish and that will give elegance to the room where it is placed. The frame is made up of four modules, has dimensions of 161 x 90 millimetres and it is installed by means of recessed in the horizontal position vertically, according to the needs. The thermoplastic material of which it is made makes it highly resistant to external harmful actions and / or low and high temperatures. Its maintenance is also very simple and consists of passing a soft cloth slightly moistened in soapy water.
