

Single rocker for two-pole switch with pilot light and I/O symbol graphite Simon 75

REF. 75032-38

BASIC INFORMATION

DESCRIPTION

The individual rocker for double-pole switch with pilot and white I / O engraving Simon 75 has 6 different finishes, it is recommended to choose the frame with the same colour of the selected rocker. It can be installed in 2 different ways, surface mounting or flush mounting. The most common temperature ranges of the individual rocker for double-pole switch with pilot is 5 to 40° with a limit ranging from -25 to 50°. This type of rocker applies the regulation UNE-EN 60669-1: 2002 + A1: 2003 + A2: 2009. The main manufacturing material is thermostable with a plastic graphite finish. The rocker for double-pole switch with pilot light is of individual version and does not contain any module but an element. This model includes pilot and I / O engraving además to include the signaling function. It is recommended for the correct maintenance of the individual for double-pole switch with pilot to use a soft cloth slightly moistened in soapy water to clean it properly.
