Intermediate piece for 1 element black Simon 75

REF. **75907-39**

BASIC INFORMATION

DESCRIPTION

In the Simon 75 series we find the intermediate piece in black finish, with its colour, it allows to add a detail appearance to those frames to be adapted. Designed to contain a single element, requires parts pieces for its assembly. Its manufacturing material is thermoplastic, which gives durability and resistance to the heat. In its installation it is expected that adapts to the frames in surface-mounted, as well as to those to be recessed in a universal box. For its maintenance it is only necessary to use a cloth moistened in soapy water, without abrasive cleaners or with socket chlorine that could damage.

FINISH

Black

COMPATIBILITY

Simon 75 frames

ETIM CLASS

EC002649
