

## End cover Black

REF. 89911438-039

### BASIC INFORMATION

#### DESCRIPTION

The end cover of the brand Simon is a product required and essential in any electrical panel. This is the ideal complement of any installation since the cover will protect the cabling from external challenges. If, in addition, the electrical installation is in the outdoor, this product is fully essential to which the cables and connectors of its indoor are not affected by the weather conditions. Precisely by this, this end cover is made of high quality materials. Among its peculiarities, it stands out for its self-extinguishing material that makes it in case of fire, this is not spread, with the added value that gives the product. Therefore, it is an article totally safe that does not only protective fulfils this function, but also serves to the routing of the electric cables. It measures more spacious, that the cables that houses in its indoor, for this facilitate its handling. Moreover, its installation is extremely simple using 3-phase rail, a system that allows you to expand, reduce or modify light points and data, according to the needs. Its classic colour white makes it possible to combine with almost any type of installation.
