# Back kit for 2 elements with 2 two-way switches Simon 100

REF. **10010201-039**

## BASIC INFORMATION

### DESCRIPTION

Rear face kit for 2 elements with 2 two-way switches from the Simon 100 series, its installation is done by cutting, which means that you will not waste a single minute of additional time in your installation because it is done with a simple click , you will just need a current of 10 AX and a voltage of 250 V ~ for the system to work perfectly. Its operation is based on a push button switch. Some of the main innovations of the new collection include a multiple frame holder, one-click terminal connection which makes installation fast and safe, optimizes the use of space through perfect alignment, and also wishes to establish a philosophy: Pulsation lead with a unique feeling when interacting. Simon 100 is the first collection to integrate the Simon IO system, based on the fact that the switches go from analog to digital, which allows you to interconnect the devices you have in your home and give a new dimension to spaces .
