Plate for electronic rotary mechanisms graphite Simon 82

REF. **82054-38**

BASIC INFORMATION

DESCRIPTION

With measures of 55x55 mm, this special plate for rotating mechanisms belongs to the Simon 82 series, it is in graphite colour, but also has a total of 6 finishes to choose from. To achieve a harmonious set, we recommend choosing a plate with the same colour of the frame to be combined with. You can position, place the piece in a simple way, as you can choose between recessed or placed on a surface-mounted. The plate is made of high quality thermoplastic, complying with the current regulation. It is recommended to keep the piece between 5 and 40°C, although its resistance makes it capable of operating in extreme temperatures up to -25 and 50°C. If you want to clean the plate, we recommend using a soft and slightly damp cloth, in any case, avoid all abrasive products.

FINISH

Graphite

MATERIAL

Plastic

PACKAGING CONTENTS

Plate

SYMBOL

Without engravings

COMPATIBILITY

Simon 75 mechanisms

ETIM CLASS

EC000011

REMARKS

Available in 6 finishes. It is recommended to choose a frame with a base the same colour as the selected rocker.
