

Digital alarm clock with display

REF. 75815-39

BASIC INFORMATION

DESCRIPTION

Precise and durable is the digital alarm clock with display of the wide and extensive range of products of the Simon 75. Requires a power of 230V~, the type of terminal connection is screwed and works by pulsation. The watch is equipped with 2 types of reset in the alarm: Home mode and hotel mode (resettable / non-resettable). For its installation, it will be enough to recess it or position, place on the surface. The material with which it has been manufactured is socket of electronic components with halogen-free thermoplastic insulation. These materials are prepared to maintain the functionalities of the product at temperatures ranging from 0 to 40°C, which can support maximum temperatures of up to -20 and 75°C. This product complies perfectly with the current regulation.
