Blind cover gloss white Simon 100

REF. **10000800-130**

BASIC INFORMATION

DESCRIPTION

The blind plate of the Simon 100 series is white with a quartz effect. This half-element cover is made of PMMA with a thermoplastic grip and complies with the following European standards and regulations: EN 60669-1: 1999 + A1: 2002 + A2: 2008; EN 50581: 2012. This is a cover suitable for flush mounting on surfaces with a temperature between 0 and 40 &#65533; C, although it can withstand extreme temperatures of approximately -25 to 75 &#65533; C. Clean it very simply, because you just need to wipe it with a soft cloth slightly dampened with soapy water and never use abrasive rags or cleaners containing chlorine. The 100 series commemorates Simon's centenary and was created with one purpose and not one that you never stop feeling. This series features the first switch with a push mechanism designed to be used with eyes closed. It is also designed to facilitate interaction between users.
