Plate for electronic touch mechanisms with blue light white Simon 82

REF. **82034-30**

BASIC INFORMATION

DESCRIPTION

Plate made for touch electronic devices with blue light and finished in white colour is included in the Simon 82 series, this piece has exquisite functionalities, impeccable design and the opportunity to enjoy the new interface in terms of pulsation mechanisms. Will feel that you are by pressing the switch but it is just an effect that makes the interface that Simon has prepared for your home to be equipped to the latest, with the most advanced design and features known. Thanks to the compatibility with the Simon 77 series, installing the elements has become a real step, since in just three steps you will have the element installed without the need to use a single tool and of course without staining your hands when peeling or braiding any type of wire. Benefit from the wide range of textures and avant-garde finishes available in the range with the selection of one of them among six different finishes offered by the Simon 82 series to achieve the perfect adaptation of the elements with your home.
