

Interchangeable case for 4 half elements (2 elements) American frame arctic aubergine Simon 27 Play

REF. 2700654-085

BASIC INFORMATION

DESCRIPTION

In the Simon 27 Play series, range Arctic, we have this interchangeable cover for American frame. The casing is designed for 4 half elements (2 elements) and is aubergine colour. We recommend the use of rockers and covers of graphite colour to combine them with the sleeve, this way you will achieve a design result. For the installation of the part, it is sufficient to recess it both vertically and horizontally, as it is suitable for this purpose. Its dimensions of 86x148 mm facilitate its installation. The cover is made from thermoplastic, a material that gives the piece of resistance to guarantee optimum operation between 5 and 40°C. All modes is also capable of withstanding temperatures of up to -25 and 50°C. If you want to clean the piece, it is sufficient to use a cloth dampened with soap and water, always avoiding abrasive products that could damage the cover.

FINISH

Aubergine

COMPATIBILITY

Simon 27 Play mechanisms
