

Interchangeable case for 2 half elements (1 element) American frame orange Simon 27 Play

REF. 2700652-072

BASIC INFORMATION

DESCRIPTION

The interchangeable sleeves of the Simon 27 series are presented in bold and vivid colours. This makes them the perfect solution for rooms with the most trendy and modern decor, all this with the most innovative design. In this range we have the interchangeable cover for American frame of 2 half elements (1 element) in orange finish, a piece measuring 86x125 mm, suitable for flush mounting both vertically and horizontally. Why is it one of the most demanded products by professionals and private individuals? Maybe because its installation can be carried out without the need for tools or prior knowledge. Or because it can be combined with white rockers and covers. Moreover, its design allows it to withstand extreme environments with high humidity and temperatures, without affecting the qualities of its structure, which has been manufactured with thermoplastic components, but if anything differentiates this product from other similar products manufactured by the competition, it is its great value for money.

FINISH

Orange

COMPATIBILITY

Simon 27 Play mechanisms

PACKAGING CONTENTS

Interchangeable case for 2 half elements.

MATERIAL

Plastic
