

# Single rocker for switches with pilot light white Simon 88

REF. 88012-30

## BASIC INFORMATION

### DESCRIPTION

Individual rocker white in colour (even if it is available in 3 finishes), for control mechanisms with pilot light, of the series Simon 88. It can be installed in rooms with a temperature located between 5 and 40°C, approximately, although it can withstand extreme temperatures of -25 to 50°C, plus or minus. Its diameter is 68,3 mm and is made of thermoset, a material very easy to clean, as you just have to use a soft cloth slightly moistened in soapy water, without having to resort to cloths or abrasive cleaners containing chlorine. Simon 88 series stands out for being compatible with the Simon 77 mechanisms and, above all, by a break of the square shapes, that give this series strong personality and is that its circular or square frame and the shape of its rocker attract glances, at the same time as the challenge preconceived ideas.

### FINISH

White

### COMPATIBILITY

Simon 75 mechanisms

### ETIM CLASS

EC000011

### SYMBOL

Pilot light

### PACKAGING CONTENTS

Single rocker

### REMARKS

Available in 3 finishes.
