Voice and data flat plate with dust cover for 1 element for 1 RJ45 compatible other manufacturers white Simon K45

REF. **K76/9**

BASIC INFORMATION

DESCRIPTION

The voice and data connections are basic in our day to day and should be key in our work stations. As always Simon has been designed to bring us the best elements for these links and that is why the collection Simon has devised K45. This series Simon K45 has a wide range of elements that make the use of connections, of any type, in our workplace. For this reason, we present this plate of voice and data of an element for RJ45 connectors, white in colour, with a flat plate without dust cover, it is designed to be compatible with any manufacturer of the market. In addition, as it is characteristic in all Simon products, so its installation, such as the use and cleaning are always easy and quick all this without counteracting the quality of its materials and its products and modern design and with multiple options.

FINISH

White
