Adaptor for AMP® RJ45 IT connectors in angled plates Simon

REF. **75001-39**

BASIC INFORMATION

DESCRIPTION

This part adapter for RJ45 AMP ® computer connections is of the series Simon 75 product and it is only suitable for inclined plates. The thermoplastic material of which it is manufactured, it is highly resistant. Thanks to the features of its components, the plate ensures optimum operation low temperatures very high or low, ranging from -25 to 50 degrees centigrade. Also, it is a product of great hardness which makes it to withstand best possible challenges external as knocks or scratches. Simon products are characterized by being made of the best materials of the market. The brand wants to offer a product efficient and safe, which also adapts cleaner in appearance to those rooms where it is placed. Its maintenance is very simple and consists of this only to use a dry and soft cloth. Do not have to use any cleaning product information, and much less if it is abrasive or contains colour because it could damage the product and damage its structure.
