

Switch for blinds 10A 250V~ with 3 positions: up, down and stop Simon 28

REF. 26333-39

BASIC INFORMATION

DESCRIPTION

The control mechanisms of the series Simon 28 have been designed with the aim of to have maximum control over the operation of the different electrical systems in homes and businesses. For example, if we are talking about an electronic shutter system, the Switch for blinds with 3 positions (up, down and stop) included in this range is one of the most demanded by professionals and individuals. With a current of 10 A, a voltage of 250V ~, this mechanism is equipped with a control unit position to stop the rise / fall of the blind. It also supports a wire cross section of 1.5 to 2.5 mm and the stripping of the wire 15 mm. The metal components with halogen-free thermoplastic insulation with which it has been manufactured is converted into a switch, ideal to offer the best performance without that its structure from deteriorating with the passage of time.

COMPATIBILITY

Simon 28 frames

PACKAGING CONTENTS

Mechanism
