

Voice and data flat plate with dust cover for 1 element for 2 IBM® RJ45 connectors white Simon K45

REF. KB87/9

BASIC INFORMATION

DESCRIPTION

White in colour, we have this plate of voice and data of the series Simon K45. This is a flat base plate, with dust shutter and an element for two RJ45 connectors, IBM. It has been manufactured in material and is fully thermoplastically insulating components free of halogens. With this feature is guarantees the security of the product at high temperatures. This plate is Simon K45 individual with a number of modules. It is available for both one as for two RJ45 connectors. It can be perfectly combined in vertical enclosures. To do this, it is necessary to position, place the 90 ° positioner (ref. K66). The dimensions of the plate of voice and data white are 45 x 45 millimetres and 8.5 millimetres of depth. This provides the product with a size quite low, which makes it possible to the maximum functionality. You can install in flat surfaces or recessed. To clean the voice and data plates of the series Simon K45, it is not necessary to use abrasive cleaners, just with a soft, dry cloth.
