

Hinged cover with safety device for German socket outlet graphite Simon 75

REF. 75090-68

BASIC INFORMATION

DESCRIPTION

For one hundred years, the security is present in Simon products. This is one of the reasons that has allowed the articles included in its different series to be present in most public and private buildings such as offices, headquarters of official organizations, commercial establishments, educational centres or restaurants. For example, the hinged cover with safety device for Shuko socket-outlet in graphite of the Simon 75 series, this piece, which can be installed on the surface-mounted or recess in a universal box, has been made with the best thermoplastic materials. It also consists of maximum security and resistance to oxidation due to temperature and humidity conditions. The cover is available in four finishes and is perfect for applications that require a high degree of resistance to knocks, friction or vandalism against electrical systems.
