

Double rocker for blinds mechanism white Simon 82 Centralisations

REF. 82029-50

BASIC INFORMATION

DESCRIPTION

Double rocker for control mechanisms of blinds. It is part of the Simon 82 series, Centralizations and has a discreet and versatile finished in white colour. These rockers for control mechanisms Simon is available in a total of five different finishes. For this reason, the brand recommended to choose a frame in the same colour as the white baseboard of the rocker to be installed. This rocker Simon is a double version and a single element, which does not include a signaling function. It has an engraving that shows the raising and lowering of the shutter, making the product rocker in a user-friendly and very easy to handle. It can be installed in two different shapes: Both in surface-mounted and flush mounted. The maintenance of the rockers Simon is really simple, as only, it is necessary to use a soft damp cloth in a soapy water solution to ensure its perfect condition.
