

Double rocker for switches white Simon 88

REF. 88026-30

BASIC INFORMATION

DESCRIPTION

This double Rocker of the series Simon 88, is suitable for control mechanisms white and comes in a classic colour white that will be perfectly in any room of the home, office or premises where it is, regardless of its decorative style. The rocker has dimensions of 68,3 millimetres. Even so, the rocker is available in three possible finishes to choose from, in this sense, Simon seeks to create multifunctional products that does not only met with the purpose for which they were created, but to convert in decorative elements to embellish the rooms where it is located. The manufacturing material of the rocker is thermostable, which gives it a high resistance and hardness compared to high and low temperatures, as well as against possible challenges external as knocks or scratches. Its maintenance is very simple and to do so you only need to use a cloth slightly moistened in water with soap. There is no need of any cleaning product and less if it is abrasive or contains colour, as it could damage the structure of the product.

FINISH

White

PACKAGING CONTENTS

Double rocker

COMPATIBILITY

Simon 75 mechanisms

ETIM CLASS

EC000011
