

Flat voice and data plate with dust cover for 2 Systimax® RJ45 connectors ivory Simon 75

REF. 75593-61

BASIC INFORMATION

DESCRIPTION

Quality and good price are not at odds in the different elements that make up the electrical and electronic systems. So at least what we think of Simon since our inception. An example of this perfect and desirable binomial for all customers of a company is the Voice and Data Plate with dust cover for two RJ45 connectors in ivory colour of the Simon 75 series. Compatible with Systimax connectors, it is a type of flat base plate that includes a RJ-45 adapted module with double connector. It is available in three different finishes, which is why it is recommended to choose a frame with the same baseboard colour as the selected rocker. It is a plate with great resistance to knocks or oxidation that occurs over the years thanks to the thermoplastic components with which it has been made stand out.

FINISH

Ivory

MATERIAL

Thermoplastic

PACKAGING CONTENTS

Plate

SYMBOL

Without engravings

COMPATIBILITY

Simon 75 mechanisms

REMARKS

Available in 3 finishes. It is recommended to choose a frame the same colour as the selected plate.
