Voice and data angled plate with dust cover for 1 element for 2 RJ45 connectors aluminium Simon K45

REF. **KB80/8**

BASIC INFORMATION

DESCRIPTION

The different machining of the series Simon K45 offer a wide variety of alternative to the connections in the workplace. Thanks to the quantity (QTY.) of elements different according to each connection and its various colours and finishes, form a perfect set that adapts to any need and ambience. This plate for voice and data connections is one of them, it is a plate and has a dust shutter which maintains the connections untouched. It is suitable for flush mounting or surface-mounted, it has two RJ45 connectors and an aluminium finish for all those environments with personality. Also, if we use the Simon K66 positioner, you can combine it with vertical enclosures to guide the plate vertically, adapting to any space and having. Simon K45 offers solutions for harsh environments where it is necessary to have a good connection, the type. Also, thanks to its wide range of colours and finishes, is easy to be combined and work in any ambience.
