

Flat voice and data plate with dust cover for 2 RJ45 connectors cold aluminium Simon 82 Detail

REF. 82006-93

BASIC INFORMATION

DESCRIPTION

Simple solutions for electrical installations. This could be the slogan of Simon, a benchmark company in the sector. There are many products and mechanisms available to its customers. One of them is the flat voice and data plate with dust cover in cold aluminium colour included in the Simon 82 Detail series, a piece made for two RJ-45 format connectors. Suitable for surface and flush mounting, this plate allows you to choose the frame with the same baseboard colour as the rocker selected from the six finishes available in the catalogue. With the best quality-price ratio that can be found in the market today, another of its advantages is its easy cleaning and maintenance, which can be carried out with a soft and dry cloth to not affect the materials of thermoplastic metallized with which its structure has been manufactured.
