DESCRIPTION

Adjustable master switch ion made in black with a glossy finish. It belongs to the Simon 100 series, the first collection of the brand that integrates the ion system in the switches, leading the transition from analogue to digital. Specifically, it has an ion supply from the mechanism and with a switch with Wi-Fi / Z-wave ion protocol.

Its installation is done horizontally, and has been manufactured with PMMA materials with thermoplastic base, which gives it great performance in terms of durability and resistance.
