Flat voice and data plate with dust cover 1 element for 2 RJ45, compatible other manufacturers white Simon 500 Cima

REF. **50000089-030**

BASIC INFORMATION

DESCRIPTION

Compatible with elements from other manufacturers, the Simon 500 Cima series designed the flat plate for voice and data with dust cover for an element for two RJ45 connectors, white in colour. One of its great advantages is that this plate includes clips for fastening in vertical and horizontal enclosures without the need for an adaptor, in addition to a price that it has no competition in the current market by other similar products of the competition. Its structure, which has dimensions of 50 x 50 x 11 mm, has been manufactured with thermoplastic free of halogen components, a material that guarantees no flame propagation in case of fire and the low toxicity in case of smoke, which translates into a high level of security for the electrical installations of private homes, companies or commercial premises, in which it is used.
