

Spotlight 740.00 Rail 4000K Flood CR90 White

REF. 74000030-394

BASIC INFORMATION

DESCRIPTION

The 740.00 Rail Spotlight 4000 K Flood CR90 White of the range of spotlights 740 of Simon is a spotlight manufactured in aluminium of the highest quality and has a thermal. His exceptional design makes it a white colour spotlight discreet and stylish and its textured paint guarantees its durability.

This type of spotlights of a high colour temperature (4000 K) are especially recommended for retail, commercial premises, restaurants, art galleries and museums. But not just due to its colour temperature, but thanks to its high colour rendering index CRI, with a data from 90 to 100.

Thanks to its flood optics and to the fact that it has an angle of opening beam of up to 27 degrees, this type of spotlights allows the organisation of elements where it is placed, something that enables you to create specific areas of light that draw the attention to the element or object that it focuses on. If either its IP rating is not too high (20), if we can assert that it is a powerful spotlight thanks to its capacity of 30 W. This power is sufficient to send to 2280 lm, a number is too high but enough.

APPLICATION

Accent lighting, General lighting
