Rocker with viewer for push button switch with indicator light function for 1 element aluminium Simon K45

REF. **K113/8**

BASIC INFORMATION

DESCRIPTION

This product is part of the range of mechanisms and rockers of the series Simon K45. This is a rocker with viewer specially designed for push-button switch with indicator light function for an element. The product is made up of four modules and has dimensions of 45 x 22.5 millimetres and 10 millimetres of depth. It is presented in a beautiful and modern finished in aluminium colour, so it is advisable to combine it with the push-button switch in the same finish, with the aim of not break with the harmony appearance of the end product. Its installation is very simple and is carried out by means of recessed or surface-mounted. However, it is necessary to highlight that it is not possible to combine 2 narrow rocker for control mechanisms with in a adaptor plate Simon 500 Cima and Simon K45. The manufacturing material is halogen-free thermoplastic, a quality material that presents enormous benefits for this type of products, as it does not contributes to flame spread in case of fire and also reduces the toxicity of smoke.
