

Intermediate switch 10A 250V~ half element with fast terminal connection system

REF. 75253-69

BASIC INFORMATION

DESCRIPTION

Between the control mechanisms of Simon we find a wide range of products of the highest quality and a great versatility. This is the crossing 10 AX current and a voltage of 250 V. has half an element and its clamping system is fast. The operation of this crossing switch is tilting. The product is part of the Simon 82 series. To give functionality at the crossing Simon, it is possible to include the signaling function via the support with neon lamp and rocker with viewer. It is the individual version of the product, which does not include any type of signaling function. The installation of the crossing Simon you can perform either flush-mounted as on the surface-mounted. This provides the control mechanism of a great versatility. To which the product will last much in perfect condition, it is recommended to clean it with a soft cloth, cotton, that is completely dry cloth, i.e., always avoiding aggressive cleaners.
