

Double rocker with viewer for switches graphite Simon 75

REF. 75025-38

BASIC INFORMATION

DESCRIPTION

Available in the colours snow white, ivory, grey and graphite, the double Rocker with sight glass for control mechanisms of the Simon 75 series has become one of the most demanded parts for both individuals and professionals. Having two mechanisms in one increases the possibilities that we can apply to our electrical systems from a single point, saving money and space. The innovative design of this rocker allows you to recess the product or to place it on the surface-mounted depending on each space. Its resistance to knocks is achieved thanks to the thermoset materials with which it has been elaborated, which translates into an ideal rocker for places with a lot of daily traffic of people. Short-, medium- and long-term reliability, a circumstance for which many companies have already opted for it for their electrical installations.

FINISH

Graphite

MATERIAL

Thermosettable

PACKAGING CONTENTS

Double rocker and fastening bracket

SYMBOL

Without engravings

COMPATIBILITY

Simon 75 and Simon 77 mechanisms

ETIM CLASS

EC000011
