SOLAR BEACON TACOMA

REF. **IL340150**

BASIC INFORMATION

DESCRIPTION

The Tacoma solar beacon from the Luxform brand illuminates with an integrated LED that provides a warm white light with 15 lumens, ideal for lighting gardens. It is made of stainless steel and glass, measuring 50.4 cm in height and having a diameter of 6.2 cm. It charges through the solar panel located on the top of the beacon, allowing it to be placed anywhere in the garden without the need for an electrical connection. The Tacoma beacon contains solar technology that adapts to the capacity of the battery stored during the day; when the battery is not fully charged, the light output automatically adjusts to ensure there is enough energy to operate for 6 hours. This guarantees safety at home and in the garden 365 days a year, while also providing energy savings to the household thanks to its LED lighting. At sunset, the lights turn on automatically. It can be easily placed on both paved and unpaved surfaces.
